- Pune, Maharashtra

EDUCATION

- MIT World Peace University
Integrated B.Tech Computer Science - 8.89
07/2024 - 06/2027
- MIT World Peace University
Diploma in B.Teach CSE - 9.01
08/2021 - 06/2024
- Sri Venkateshwar International School
10th Grade - 81%
2020-2021

SKILLS

- Swift and Mac OS
- Figma
- crewai and OpenAI
- Python and Java
- TensorFlow and PyTorch
- Basic Data Analysis
- Data Structures and Algorithms
- Object Oriented Programming
- SQL Basics
- Debugging Techniques
- Git and GitHub
- Project Management
- Team Collaboration

ACHIEVMENTS

- Awarded a Letter of Appreciation for work on Local Data Architects in the Apple-Infosys iOS Student Development Program.
- Co-authored and published a research paper on Anomaly Detection using Machine Learning at ICISC Convergence 2024.

DHAANI JAIN

ABOUT ME

Motivated Computer Science undergraduate at MIT World Peace University with expertise in software development, machine learning, and data systems. Developed AI-driven solutions and mobile applications through academic projects and internships. Currently creating an iOS application in the Apple & Infosys iOS Development Program, focused on building scalable systems and leveraging AI and cloud technologies to solve real-world challenges.

WORK EXPERIENCE

- ChistaDATA.CO 01/2024 - 05/2024
 - Analyzed website traffic data with Python, Pandas, and NumPy to extract actionable performance insights.
 - Applied data analysis and visualization techniques to support decision-making.
 - Collaborated with team members to enhance platform performance and streamline reporting workflows.
- Synapse AI Club 09/2024 - Current
 - Developed AutoMLP, an automated machine learning pipeline, enhancing model deployment efficiency.
 - Collaborated with developers to design and test machine learning models, ensuring alignment with project goals.

PROJECTS

- iOS Application Development | June 2025 - June 2026
 - Built a peer-to-peer learning iOS app for sharing notes and accessing study resources.
 - Developed dynamic UICollectionView - based UI for sessions and evaluations.
 - Ensured scalable backend connectivity and smooth mobile UX.
- Machine Learning Research - Anomaly Detection
 - Developed a machine learning model to detect anomalies in datasets using statistical and ML techniques.
 - Conducted experiments and analysis leading to a published research paper.
- STOXiE.ai - AI Stock Sentiment & Prediction System (https://github.com/dhaanijain/stock_analyser)
 - Built an end-to-end data pipeline to extract financial data from APIs, perform preprocessing and sentiment analysis using NLP, and store processed data for downstream analytics
 - Implemented data cleaning and transformation workflows to handle missing and noisy data
 - Designed a scheduled data processing flow to update predictions and dashboards
